

# Innovative Solutions and Applications of Web Services Technology

Part of the Advances in Web Technologies and Engineering Book Series

Liang-Jie Zhang (IBM T.J. Watson Research, USA) and Yishuang Ning (Tsinghua University, China)

## Description:

With the development of Web 2.0 technologies, the internet has become a huge platform for information and data sharing. As such, web services provide an important foundation for branching technologies in end-user computing and applications. To make online technology more accessible for users, it is important to optimize web services to function properly or offer a personalized experience.

**Innovative Solutions and Applications of Web Services Technology** is a collection of innovative research on the methods and applications of existing technologies for web service usability and accessibility. Highlighting a range of topics including business processes, cyber-physical systems, and recommendation accuracy, this book is ideally designed for IT professionals, researchers, graduate-level students, software developers, academicians, and computer engineers seeking current research on adapting online information and services to user needs.

**ISBN:** 9781522572688

**Release Date:** October, 2018

**Copyright:** 2019

**Pages:** 300

## Topics Covered:

- Answer Set Programming
- Blockchain
- Business Processes
- Cyber-Physical Systems
- Machine Learning
- Model-Based Development
- Privacy Policy
- Recommendation Accuracy
- Semantic Service Composition
- Web Service Clustering

**Hardcover:** \$215.00

**E-Book:** \$215.00

**Hardcover + E-Book:** \$260.00
