Released: February 2013

Optimizing, Innovating, and Capitalizing on Information Systems for Operations

John Wang (Montclair State University, USA)

Adapting the development of information systems for operations management is essential for the effectiveness of an organization's business strategy.

Optimizing, Innovating, and Capitalizing on Information Systems for Operations presents research on the applications of information systems and its influence on business and operations management. Highlighting case studies, frameworks and methodologies, this book aims to be useful for practitioners and academics in the fields of decision, management, and social sciences.

Topics Covered:

- Computational Intelligence
- Engineering Management
- Information Technology
- Knowledge Management
- Organizational Behavior
- Sociology
- Telecommunications

ISBN: 9781466629257; © 2013; 462 pp.

Print: US \$185.00 | Perpetual: US \$280.00 | Print + Perpetual: US \$370.00

Pre-pub Discount:*

Print: US \$175.00 | Perpetual: US \$265.00

* Pre-pub price is good through one month after publication date.

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

John Wang is a professor in the Department of Information & Operations Management at Montclair State University, USA. Having received a scholarship award, he came to the USA and completed his PhD in operations research from Temple University. Due to his extraordinary contributions beyond a tenured full professor, Dr. Wang has been honored with a special range adjustment in 2006. He has published over 100 refereed papers and seven books. He has also developed several computer software programs based on his research findings. He is the Editor-in-Chief of *International Journal of Applied Management Science*, *International Journal of Operations Research and Information Systems*, and *International Journal of Information Systems and Supply Chain Management*. He is the Editor of *Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications* (six-volume) and the Editor of the *Encyclopedia of Data Warehousing and Mining*, 1st (two-volume) and 2nd (four-volume). His long-term research goal is on the synergy of operations research, data mining and cybernetics.

Publishing Academic Excellence
at the Pace of Technology Since 1988

Section 1: Optimization Methodologies

Chapter 1

Local Perturbation Analysis of Linear Programming with Functional Relation Among Parameters
Hanafizadeh Payam (Allameh Tabataba'i University, Iran)
Ghaemi Abolfazl (Amirkabir University of Technology, Iran)
Tavana Madjid (La Salle University, USA)

Chapter 2

Taylor Kriging Metamodeling for Stochastic Simulation Interpolation
Liu Heping (North Dakota State University, USA)
Chen Yanli (Auburn University, USA)

Chapter 3

Bounded Primal Simplex Algorithm for Bounded Linear Programming with Fuzzy Cost Coefficients
Ebrahimnejad Ali (Islamic Azad University, Qaemshahr Branch, Iran)
Nasseri Seyed Hadi (Mazandaran University, Iran)
Mansourzadeh Sayyed Mehdi (Islamic Azad University, Jouybar Branch, Iran)

Chapter 4

Sensitivity Analysis on Linear Programming Problems with Trapezoidal Fuzzy Variables
Nasseri Seyed Hadi (University of Mazandaran, Iran)
Ebrahimnejad Ali (Islamic Azad University, Qaemshahr Branch, Iran)

Chapter 5

Optimizing Series Repairable Systems with Imperfect Repair
Hajeeh Mohammed (Kuwait Institute for Scientific Research, Kuwait)

Chapter 6

Data Envelopment Analysis with Fuzzy Parameters
Hatami-Marbini Adel (Universite Catholique de Louvain, Belgium)
Saati Saber (Islamic Azad University, Iran)
Tavana Madjid (La Salle University, USA)

Section 2: Business Analytics

Chapter 7

Information in Fleeting Opportunities
Almojel Ibrahim (Stanford University, USA)
Matheson Jim (SmartOrg, USA)
Canbolat Pelin (Stanford University, USA)

Chapter 8

Sequential Test for Arbitrary Ratio of Mean Times Between Failures
Michlin Yefim H. (Technion- Israel Institute of Technology, Israel)
Ingman Dov (Technion-Israel Institute of Technology, Israel)
Dayan Yoram (ELTA Systems Ltd., Israel)

Chapter 9

Portfolio Selection Models and Their Discrimination
Ghosh Satadal (Indian Institute of Science, India)
Majumdar Sujit Kumar (Indian Statistical Institute, India)

Chapter 10

Predicting Donations from a Cohort Group of Donors to Charities
Chao Gary H. (Kutztown University, USA)
Hsu Maxwell K. (University of Wisconsin-Whitewater, USA)
Scovotti Carol (University of Wisconsin-Whitewater, USA)

Chapter 11

Measuring the Effect of the Rules and Regulations on Global Malmquist Index
Alirezae Mohammadreza (Iran University of Science and Technology, Iran)
Afsharian Mohsen (Iran University of Science and Technology, Iran)

Chapter 12

Equal Pricing Strategies in a Dual Channel Supply Chain
Wen Ue-Pyng (National Tsing Hua University, Taiwan)
Chen Yun-Chu (National Tsing Hua University, Taiwan)
Cheung Kam-Hong (MGM Macau, China)

Section 3: Logistics Optimization

Chapter 13

Multi Depot Probabilistic Vehicle Routing Problems with a Time Window
Samanta Sutapa (Maryland State Highway Administration, USA)
Jha Manoj K. (Morgan State University, USA)

Chapter 14

A Heuristic Algorithm for the Inner-City Multi-Drop
Pan Li (The University of Hong Kong, China)
Chu Sydney C. K. (The University of Hong Kong, China)
Han Guangyue (The University of Hong Kong, China)
Huang Joshua Zhexue (Shenzhen Institutes of Advanced Technology, China)

Chapter 15

A Stochastic Truck Routing Model for Agricultural Freight
Mitra Subhro (University of North Texas at Dallas, USA)
Szmerekovsky Joseph (North Dakota State University, USA)
Barabanov Nikita (North Dakota State University, USA)

Chapter 16

Highway Alignment Optimization Using Cost-Benefit Analysis Under User Equilibrium
Maji Avijit (Maryland State Highway Administration, USA)
Jha Manoj K. (Morgan State University, USA)

Chapter 17

Methods for Solving Fully Fuzzy Transportation Problems Based on Classical Transportation Methods
Kumar Amit (Thapar University, India)
Kaur Amarpreet (Thapar University, India)

Section 4: Inventory Control

Chapter 18

Comments on Two Models for Operating Two-Warehouse Inventory Systems with Deteriorating Items and Inflationary Effects
Xiong Huachun (Tsinghua University, China)
Xie Jinxing (Tsinghua University, China)
Niu Bo (China Railway Express Co., China)

Chapter 19

An Integrated Vendor-Buyer Model with Uncertain Lead Time, Life Time under Inflation and Variable Holding Cost
Singh S. R. (D. N. College, India)
Bhatia Diksha (D. N. College, India)

Chapter 20

EOQ Model with Time Dependent Demand Rate and Time Dependent Holding Cost Function
Tripathi R. P. (Uttarkhand Technical University (DIT), India)
