

Digital Transformation and Innovation in Chinese Education

Part of the Advances in Educational Technologies and Instructional Design Book Series

Hiller A. Spires (North Carolina State University, USA)

Description:

Technology use has become increasingly popular in education. Due to cultural influences and access issues, advances in digital teaching and learning in Chinese education have been slow; however, certain regions have been able to successfully integrate technology into their curriculum and instruction techniques.

Digital Transformation and Innovation in Chinese Education is an essential reference source featuring the latest scholarly research on utilizing technology in Chinese learning and instruction, and it provides insights to classroom transformations within the context of Chinese culture. Including coverage on a broad range of topics and perspectives such as MOOCs, blended learning, and e-learning, this publication is ideally designed for academicians, researchers, and students seeking current research on technological innovation in Chinese education.
