Emerging Trends in the Development and Application of Composite Indicators

Part of the Advances in Data Mining and Database Management Book Series
Veljko Jeremic (University of Belgrade, Serbia), Zoran Radojcic (University of Belgrade, Serbia) and Marina Dobrota (University of Belgrade, Serbia)

Description:
Perceiving complex multidimensional problems has proven to be a difficult task for people to overcome. However, introducing composite indicators into such problems allows the opportunity to reduce the problem's complexity.

Emerging Trends in the Development and Application of Composite Indicators is an authoritative reference source for the latest scholarly research on the benefits and challenges presented by building composite indicators, and how these techniques promote optimized critical thinking. Highlights various indicator types and quantitative methods.

Readers:
This book is ideally designed for developers, researchers, public officials, and upper-level students.
