

Nanotechnology Applications in Environmental Engineering

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Rabia Nazir (Pakistan Council of Scientific and Industrial Research Laboratories Complex, Pakistan)

Description:

Nanotechnology is the twenty-first century revolution that has impacted each and every aspect of life despite its small size. As nanoscale research continues to advance, scientists and engineers are developing new applications for many different disciplines, including environmental applications.

Nanotechnology Applications in Environmental Engineering contains innovative research on nanomaterials and their impact on the environment. It also explores the current and potential future applications of nanodevices in environmental science and engineering, showcasing how nanomaterials can be tailored to address some of the environmental remediation and sensing/detection problems faced today. While highlighting topics such as environmental science, nanomaterials, and membrane technology, this book is ideally designed for environmental scientists, nanotechnologists, chemists, engineers, and individuals seeking current research on nanotechnology and its applications in environmental engineering.

ISBN: 9781522557456

Release Date: August, 2018

Copyright: 2019

Pages: 335

Topics Covered:

- Environmental Monitoring
- Environmental Science
- Heavy Metals
- Magnetic Nanomaterials
- Nano-Sensors
- Nanomaterials
- Pollution
- Structure Property Relationship
- Waste Water Treatment

Hardcover: \$215.00

E-Book: \$215.00

Hardcover + E-Book: \$260.00
