

Avatar-Based Control, Estimation, Communications, and Development of Neuron Multi-Functional Technology Platforms

Part of the Advances in Computational Intelligence and Robotics Book Series

Vardan Mkrttchian (HHH University, Australia), Ekaterina Aleshina (Penza State University, Russia) and Leyla Gamidullaeva (Penza State University, Russia)

Description:

Avatar-Based Control, Estimation, Communications, and Development of Neuron Multi-Functional Technology Platforms is a pivotal reference source that provides vital research on the application of artificial and natural approaches towards neuron-based programs. While highlighting topics such as natural intelligence, neurolinguistics, and smart data storage, this publication presents techniques, case studies, and methodologies that combine the use of intelligent artificial and natural approaches with optimization techniques for facing problems and combines many types of hardware and software with a variety of communication technologies to enable the development of innovative applications. This book is ideally designed for researchers, practitioners, scientists, field experts, professors, and students seeking current research on the optimization of avatar-based advancements in multifaceted technology systems.

ISBN: 9781799815815

Release Date: December, 2019

Copyright: 2020

Pages: 360

Topics Covered:

- Artificial Intelligence
- Cloud-Based Applications
- Intelligent Algorithms
- Internet of Things
- Natural Intelligence
- Neural Networks
- Neurolinguistics
- Smart Data Storage
- Socioeconomic Systems
- Software-Defined Networking

Hardcover: \$245.00

E-Book: \$245.00

Hardcover + E-Book: \$295.00
