

# Modern Technologies for Big Data Classification and Clustering

Part of the Advances in Data Mining and Database Management Book Series

Hari Seetha (Vellore Institute of Technology-Andhra Pradesh, India), M. Narasimha Murty (Indian Institute of Science, India) and B. K. Tripathy (VIT University, India)

## Description:

Data has increased due to the growing use of web applications and communication devices. It is necessary to develop new techniques of managing data in order to ensure adequate usage.

**Modern Technologies for Big Data Classification and Clustering** is an essential reference source for the latest scholarly research on handling large data sets with conventional data mining and provide information about the new technologies developed for the management of large data. Featuring coverage on a broad range of topics such as text and web data analytics, risk analysis, and opinion mining, this publication is ideally designed for professionals, researchers, and students seeking current research on various concepts of big data analytics.

ISBN: 9781522528050

Release Date: August, 2017

Copyright: 2018

Pages: 270

## Topics Covered:

- Data Visualization
- Distributed Computing Systems
- Opinion Mining
- Privacy and Security
- Risk Analysis
- Social Network Analysis
- Text Data Analytics
- Web Data Analytics

Hardcover: **\$215.00**

E-Book: **\$215.00**

Hardcover + E-Book: **\$260.00**
