# Modern Software Engineering Methodologies for Mobile and Cloud Environments

Part of the Advances in Systems Analysis, Software Engineering, and High Performance Computing Book Series

António Miguel Rosado da Cruz (Instituto Politécnico de Viana do Castelo, Portugal) and Sara Paiva (Instituto Politécnico de Viana do Castelo, Portugal)

Description:

As technology continues to evolve, the popularity of mobile computing has become inherent within today's society. With the majority of the population using some form of mobile device, it has become increasingly important to develop more efficient cloud platforms.

Modern Software Engineering Methodologies for Mobile and Cloud Environments investigates emergent trends and research on innovative software platforms in mobile and cloud computing. Features state-of-the-art software engineering methods, as well as new techniques being utilized in the field.

Readers:

This book is a pivotal reference source for professionals, researchers, practitioners, and students interested in mobile and cloud environments.
