

Innovative Strategies and Frameworks in Climate Change Adaptation: Emerging Research and Opportunities

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Alexander Flor (University of the Philippines Open University, Philippines) and Benjamina Gonzalez Flor (University of the Philippines, Philippines)

Description:

The changes the earth is currently undertaking has been at the forefront of scientific discourse in recent years. Humans as a species have needed to react to these changes and shift their behavior accordingly.

Innovative Strategies and Frameworks in Climate Change Adaptation: Emerging Research and Opportunities is a critical scholarly resource that examines the relationship between humans and the changing earth as well as the ways in which humans react to these shifts. Featuring coverage on a wide range of topics such as neo-behaviorism, adaptation narrative, and taxonomy, this book is geared toward researchers, students, and academicians seeking current research on the human response to shifting conditions on the earth.
