Advanced Mobile Technologies for Secure Transaction Processing: Emerging Research and Opportunities

Part of the Advances in Wireless Technologies and Telecommunication Book Series

Raghvendra Kumar (LNCT Group of College, India), Preeta Sharan (The Oxford College of Engineering, India) and Aruna Devi (Chartered Engineer, India)

Description:

The development of mobile applications has created numerous opportunities across different industries. With these advances, the management of data has been optimized to allow a broader scope of potential uses.

Advanced Mobile Technologies for Secure Transaction Processing: Emerging Research and Opportunities is an innovative reference source for the latest academic material on the application of mobile computing for secure payment transactions. Highlighting a range of relevant topics such as information security, electronic money, and online banking, this book is ideally designed for professionals, researchers, practitioners, students, and professionals interested in novel perspectives on mobile technologies and data management.
