

FinTech as a Disruptive Technology for Financial Institutions

Part of the Advances in Finance, Accounting, and Economics Book Series

Abdul Rafay (University of Management and Technology, Pakistan)

Description:

Financial institutions are tasked with keeping businesses of all sizes financially sound while also providing accessible banking options to everyday individuals. Fintech, or financial technology, is an emerging disruptive technology in financial transaction that will change banking behavior for stakeholders and enable better traceability of funds against specific assets.

FinTech as a Disruptive Technology for Financial Institutions is an essential reference source that discusses applications of FinTech in financial institutions in small, medium, and large businesses and through cultural and religious filters. Featuring research on topics such as machine learning, market development, crypto-currency, financial security, blockchain, and financial technology, this book is ideally designed for bankers, business managers, economists, computer scientists, academicians, researchers, financial professionals, and students.
