

Green Finance for Sustainable Global Growth

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Sang-Bing Tsai (University of Electronic Science and Technology of China Zhongshan Institute, China & Civil Aviation University of China, China & WUYI University, China), Chung-Hua Shen (Shih-Chien University, Taiwan), Hua Song (Renmin University of China, China) and Baozhuang Niu (South China University of Technology, China)

Description:

Businesses working under green finance models consider the potential environmental impact in investment and financing decisions and merge the potential return, risk, and cost correlated with environmental conditions into day-to-day financial business. Under this model, the ecological environment and sustainable development of society is observed and promoted.

Green Finance for Sustainable Global Growth is an essential reference source that discusses emerging financial models that focus on sustainable development and environmental protection including developing trends in green finance, internet finance, and sustainable finance. Featuring research on topics such as competitive financing, supply chain management, and financial law, this book is ideally designed for accountants, financial managers, professionals, academicians, researchers, and students seeking coverage on the sustainable development of the finance industry.
