Development of Distributed Systems from Design to Application and Maintenance

Nik Bassis

ISBN: 9781466626478; © 2013; 367 pp. Print: US \$195.00 | Perpetual: US \$295.00 | Print + Perpetual: US \$390.00

# Pre-pub Discount:\* Print: US \$185.00 | Perpetual: US \$280.00

\* Pre-pub price is good through one month after publication date.

# Nik Bessis (University of Derby, UK)

With the continued research of distributed systems and technologies, the ability to have mixed technologies work together is crucial for the development of many types of society systems.

**Development of Distributed Systems from Design to Application and Maintenance** is a collection of research on the strategies used in the design and development of distributed systems applications. Including research from traditional and emerging areas of applied distributed systems, this book covers theories, practices, and encourages future development for researchers, practitioners, and industry professionals as well as academicians.

# **Topics Covered:**

- Collaborative Networks
- Distributed Information Systems
- Information Communication Technology
- Large Scale Distributed Systems
- Ubiquitous Environments
- Wireless Network Planning
- Wireless Sensor Networks

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Nik Bessis is currently the Head of Distributed and Intelligent Systems (DISYS) research group, a full Professor, and a Chair of Computer Science in the School of Computing and Mathematics at University of Derby (full-time), UK. He is also a part-time academic member in the Department of Computer Science and Technology at University of Bedfordshire (UK). He obtained a BA (1991) from the TEI of Athens, Greece and completed his MA (1995), and PhD (2002) at De Montfort University (Leicester, UK). His research interest is the analysis, research, and delivery of user-led developments with regard to data integration, annotation, and data push methods and services in distributed dynamic environments. These have a particular focus on the study and use of next generation, web-centric, grid and cloud technologies methods for the benefit of various virtual organizational settings including disaster management. He is involved in (more than £2.3m) and leading a number of funded research and commercial projects (more than £0.7m) in these areas. Prof. Bessis has published over 150 papers, won 2 best paper awards and is the editor of several books and the Editor-in-Chief of the *International Journal of Distributed Systems and Technologies* (IJDST). In addition, Prof. Bessis is a regular reviewer and has served several times as a keynote speaker, conferences/workshops/track chair, associate editor, session chair and scientific program committee member.

Publishing Academic Excellence at the Pace of Technology Since 1988

## Section 1: Advanced Techniques and Methods for Distributed Systems

#### Chapter 1

Defining Minimum Requirements of Inter-Collaborated Nodes by Measuring the Weight of Node Interactions Sotiriadis Stelios (University of Derby, UK) Bessis Nik (University of Derby, UK & University of Bedfordshire, UK) Huang Ye (University of Fribourg, Switzerland) Sant Paul (University of Bedfordshire, UK) Maple Carsten (University of Bedfordshire, UK)

#### Chapter 2

Bio-Inspired Techniques for Resources State Prediction in Large Scale Distributed Systems Visan Andreea (University Politehnica of Bucharest, Romania) Istin Mihai (University Politehnica of Bucharest, Romania) Pop Florin (University Politehnica of Bucharest, Romania) Cristea Valentin (University Politehnica of Bucharest, Romania)

#### Chapter 3

Reliability Based Scheduling Model (RSM) for Computational Grids Raza Zahid (Jawaharlal Nehru University, India) Vidyarthi Deo Prakash (Jawaharlal Nehru University, India)

#### Chapter 4

Performance of Wireless Sensor Networks for Different Mobile Event Path Scenarios Yang Tao (Fukuoka Institute of Technology, Japan) Mino Gjergji (Fukuoka Institute of Technology, Japan) Barolli Leonard (Fukuoka Institute of Technology, Japan) Ikeda Makoto (Seikei University, Japan) Xhafa Fatos (Technical University of Catalonia, Spain) Durresi Arjan (Indiana University-Purdue University Indianapolis, USA)

#### Chapter 5

The Development of a Parallel Ray Launching Algorithm for Wireless Network Planning Lai Zhihua (University of Bedfordshire, UK) Bessis Nik (University of Derby, UK & University of Bedfordshire, UK) De La Roche Guillaume (University of Bedfordshire, UK) Kuonen Pierre (University of Applied Science of Western Switzerland, Switzerland) Zhang Jie (University of Bedfordshire, UK) Clapworthy Gordon (University of Bedfordshire, UK)

#### Chapter 6

Soft-Checkpointing Based Hybrid Synchronous Checkpointing Protocol for Mobile Distributed Systems Kumar Parveen (Meerut Institute of Engineering & Technology, India) Garg Rachit (Singhania University, India)

### Section 2: State-of-the-Art Distributed Systems Applications

#### Chapter 7

Distributed Adaptive Windowed Stream Join Processing Tran Tri Minh (University of Vermont, USA) Lee Byung Suk (University of Vermont, USA)

#### Chapter 8

A Failure Detection System for Large Scale Distributed Systems Lavinia Andrei (University Politehnica of Bucharest, Romania) Dobre Ciprian (University Politehnica of Bucharest, Romania) Pop Florin (University Politehnica of Bucharest, Romania) Cristea Valentin (University Politehnica of Bucharest, Romania)

#### Chapter 9

Integrating Production Automation Expert Knowledge Across Engineering Domains Moser Thomas (Vienna University of Technology, Austria) Biffl Stefan (Vienna University of Technology, Austria) Sunindyo Wikan Danar (Vienna University of Technology, Austria) Winkler Dietmar (Vienna University of Technology, Austria)

#### Chapter 10

Lightweight Editing of Distributed Ubiquitous Environments: Schirmer Maximilian (Bauhaus-University Weimar, Germany) Gross Tom (University of Bamberg, Germany)

#### Chapter 11

Guaranteeing Correctness for Collaboration on Documents Using an Optimal Locking Protocol Dekeyser Stijn (University of Southern Queensland, Australia) Hidders Jan (Delft University of Technology, The Netherlands)

## Chapter 12

Collaboration Support for Activity Management in a Personal Cloud Environment Ardissono Liliana (Università di Torino, Italy) Bosio Gianni (Università di Torino, Italy) Goy Anna (Università di Torino, Italy) Petrone Giovanna (Università di Torino, Italy) Segnan Marino (Università di Torino, Italy) Torretta Fabrizio (Università di Torino, Italy)

#### Chapter 13

Matrixes of Weighing and Catastrophes José G. Hernández Ramirez (Universidad Metropolitana, Venezuela) María J. García Garcia (Minimax Consultores C. A., Venezuela) Gilberto J. Hernández Garcia (Minimax Consultores C. A., Venezuela)

#### Section 3: High-End Design Concepts for Future Distributed Systems

#### Chapter 14

Resource Management in Real Time Distributed System with Security Constraints: Tripathi Sarsij (Motilal Nehru National Institute of Technology, India) Yadav Rama Shankar (Motilal Nehru National Institute of Technology, India) Ranvijay (Motilal Nehru National Institute of Technology, India) Jana Rajib L. (Motilal Nehru National Institute of Technology, India)

#### Chapter 15

A Meta-Design Model for Creative Distributed Collaborative Design Zhu Li (Università degli Studi di Milano, Italy) Barricelli Barbara Rita (Università degli Studi di Milano, Italy) Iacob Claudia (Università degli Studi di Milano, Italy)

#### Chapter 16

Adaptable Information Provisioning in Collaborative Networks: Thimm Heiko (Pforzheim University, Germany) Rasmussen Karsten Boye (University of Southern Denmark, Denmark)

#### Chapter 17

Design and Implementation of Hybrid Time (HT) Group Communication Protocol for Homogeneous Broadcast Groups Tsuncizumi Isamu (Seikei University, Japan) Aikebaier Ailixier (Seikei University, Japan) Ikeda Makoto (Seikei University, Japan) Enokido Tomoya (Risho University, Japan) Takizawa Makoto (Seikei University, Japan)

#### Chapter 18

Information Communication Technology and a Systemic Disaster Management System Model Santos-Reyes Jairne (SEPI-ESIME, Mexico) Beard Alan N. (Heriot-Watt University, UK)

#### Chapter 19

A Next Generation Technology Victim Location and Low Level Assessment Framework for Occupational Disasters Caused by Natural Hazards Bessis Nik (University of Derby, UK & University of Bedfordshire, UK) Asimakopoulou Eleana (University of Bedfordshire, UK) Norrington Peter (University of Bedfordshire, UK) Thomas Suresh (University of Bedfordshire, UK) Varaganti Ravi (University of Bedfordshire, UK)
