

Utilizing Technology, Knowledge, and Smart Systems in Educational Administration

Part of the Advances in Educational Marketing, Administration, and Leadership Book Series

Mehmet Durnali (Hacettepe University/Ministry of National Education, Turkey) et al.

Description:

Within educational organizations, administration and leadership are relied upon for the allocation of resources as well as the optimization of processes that can include data storage, knowledge management, and decision making. To support these expectations, technologies, knowledge and smart and systems must be put into place that allows administrators and leaders to accomplish these tasks as efficiently as possible.

Utilizing Technology, Knowledge, and Smart Systems in Educational Administration is an academic research book that examines knowledge regarding scholarly exploration of the technologies, information/knowledge, and smart systems in educational administration and leadership. It provides a holistic, systematic, and comprehensive paradigm. Featuring a wide range of topics such as technology leadership in schools, technology integration in educational administration, and professional development, this book is ideal for school administrators, educational leaders, principals, IT consultants, educational software developers, academicians, researchers, professionals, educational policymakers, educators, and students.
