

# Human Values, Ethics, and Dignity in the Age of Artificial Intelligence

Swati Chakraborty (Concordia University, Canada)

## Description:

In the age of artificial intelligence (AI), the intersection of human values, ethics, and dignity has become a critical discussion point. As AI systems continue to influence decision-making processes, social dynamics, and human interactions, questions about the preservation of human dignity and ethical boundaries are evident. While AI has the potential to enhance human capabilities, it also raises complex issues related to privacy, autonomy, fairness, and accountability. Balancing innovation with the need to safeguard human values is essential to ensuring AI serves humanity in a way that respects individual rights and well-being. Further research is necessary to develop intelligent systems while creating a framework where these technologies align with human principles and values.

**Human Values, Ethics, and Dignity in the Age of Artificial Intelligence** explores the intersection of AI and human values, ethics, and dignity. It delves into the ethical challenges and implications of AI technologies, examining how these advancements impact our societal norms, human rights, and moral frameworks. This book covers topics such as digital technology, social justice, and environmental science, and is a useful resource for computer engineers, government officials, policymakers, environmental scientists, academicians, and researchers.
