

Deep Neural Networks for Multimodal Imaging and Biomedical Applications

Part of the Advances in Bioinformatics and Biomedical Engineering Book Series

Annamalai Suresh (Anna University, India), R. Udendran (Bharithidasan University, India), and S. Vimal (Anna University, India)

Description:

The field of healthcare is seeing a rapid expansion of technological advancement within current medical practices. The implementation of technologies including neural networks, multi-model imaging, genetic algorithms, and soft computing are assisting in predicting and identifying diseases, diagnosing cancer, and the examination of cells. Implementing these biomedical technologies remains a challenge for hospitals worldwide, creating a need for research on the specific applications of these computational techniques.

Deep Neural Networks for Multimodal Imaging and Biomedical Applications provides research exploring the theoretical and practical aspects of emerging data computing methods and imaging techniques within healthcare and biomedicine. The publication provides a complete set of information in a single module starting from developing deep neural networks to predicting disease by employing multi-modal imaging. Featuring coverage on a broad range of topics such as prediction models, edge computing, and quantitative measurements, this book is ideally designed for researchers, academicians, physicians, IT consultants, medical software developers, practitioners, policymakers, scholars, and students seeking current research on biomedical advancements and developing computational methods in healthcare.

ISBN: 9781799835912

Pages: 300

Copyright: 2020

Release Date: June, 2020

Hardcover: \$275.00

E-Book: \$275.00

**Hardcover
+ E-Book:** \$330.00

Topics Covered:

Biomedical Imaging
Convolutional Networks
Data Collection Methods
Edge Computing
Genetic Data Analysis

Machine Learning
Practical Healthcare Systems
Prediction Models
Quantitative Measurements
Visualization

Subject: Medical, Healthcare, and Life Sciences

Classification: Edited Reference

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate
Students; Graduate Students; Researchers;
Academicians; Professionals; Practitioners
