

Machine Law, Ethics, and Morality in the Age of Artificial Intelligence

Part of the Advances in Human and Social Aspects of Technology Book Series

Steven John Thompson (University of Maryland Global Campus, USA)

Description:

Machines and computers are becoming increasingly sophisticated and self-sustaining. As we integrate such technologies into our daily lives, questions concerning moral integrity and best practices arise. A changing world requires renegotiating our current set of standards. Without best practices to guide interaction and use with these complex machines, interaction with them will turn disastrous.

Machine Law, Ethics, and Morality in the Age of Artificial Intelligence is a collection of innovative research that presents holistic and transdisciplinary approaches to the field of machine ethics and morality and offers up-to-date and state-of-the-art perspectives on the advancement of definitions, terms, policies, philosophies, and relevant determinants related to human-machine ethics. The book encompasses theory and practice sections for each topical component of important areas of human-machine ethics both in existence today and prospective for the future. While highlighting a broad range of topics including facial recognition, health and medicine, and privacy and security, this book is ideally designed for ethicists, philosophers, scientists, lawyers, politicians, government lawmakers, researchers, academicians, and students. It is of special interest to decision- and policy-makers concerned with the identification and adoption of human-machine ethics initiatives, leading to needed policy adoption and reform for human-machine entities, their technologies, and their societal and legal obligations.

ISBN: 9781799848943

Pages: 400

Copyright: 2021

Release Date: October, 2020

Hardcover: \$295.00

E-Book: \$295.00

Softcover: \$225.00

Hardcover + E-Book: \$355.00

Topics Covered:

Artificial Intelligence
Autonomous Vehicles
Design and Regulation
Drones
Engineering Ethics
Facial Recognition

Health and Medicine
Human-Computer Interaction
Privacy and Security
Societal Impact
Surveillance
Technophilia and Technophobia

Subject: Computer Science and Information Technology

Classification: Edited Reference

Readership Level: Advanced-Academic Level (Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
