

Employing Recent Technologies for Improved Digital Governance

Part of the Advances in Electronic Government, Digital Divide, and Regional Development Book Series

Vasaki Ponnusamy (Universiti Tunku Abdul Rahman, Malaysia), Khalid Rafique (AJ&K Information technology Board, Pakistan) and Noor Zaman (Taylor's University, Malaysia)

Description:

The digital divide, caused by several factors such as poverty and slow communication technologies, has offset the progression of many developing countries. However, with rapid changes in technology, a better collaboration among communities and governance based on the latest research in ICT and technology has begun to emerge.

Employing Recent Technologies for Improved Digital Governance is an essential reference source that provides research on recent advances in the development, application, and impact of technologies for the initiative of digital governance. The book has a dual objective with the first objective being to encourage more research in deploying recent trends in the internet for deploying a collaborative digital governance. The second objective is to explore new possibilities using internet of things (IoT) and cloud/fog-based solutions for creating a collaboration between the governance and IT infrastructure. Featuring research on topics such as intelligent systems, social engineering, and cybersecurity, this book is ideally designed for policymakers, government officials, ICT specialists, researchers, academicians, industry professionals, and students.
