

Modeling and Simulation Techniques in Structural Engineering

Part of the Advances in Civil and Industrial Engineering Book Series

Pijush Samui (VIT University, India), Subrata Chakraborty (Indian Institute of Engineering Science and Technology (IIST), India) and Dookie Kim (Kunsan National University, South Korea)

Description:

The development of new and effective analytical and numerical models is essential to understanding the performance of a variety of structures. As computational methods continue to advance, so too do their applications in structural performance modeling and analysis.

Modeling and Simulation Techniques in Structural Engineering presents emerging research on computational techniques and applications within the field of structural engineering.

Readers:

This timely publication features practical applications as well as new research insights and is ideally designed for use by engineers, IT professionals, researchers, and graduate-level students.

ISBN: 9781522505884

Release Date: August, 2016

Copyright: 2017

Pages: 396

Topics Covered:

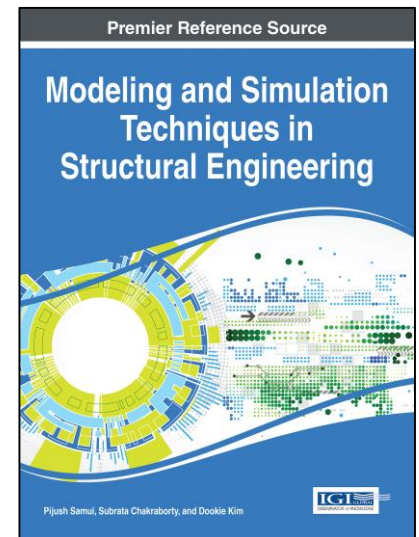

- Agent-Based Modelling
- Finite Element Analysis
- Fuzzy Structural Analysis
- Neural Networks
- Seismic Reliability Analysis
- Smart Structures
- Structural Engineering Systems
- Structural Integrity Assessment

Table of Contents

Chapter 1

Acoustic Method for the Suppression of Acoustic and Aerodynamically Induced Vibration on Structures
Harijono Djodjohardjo, Retired Professor, Indonesia

Chapter 2

Agent Based Modelling of Smart Structures: The Challenges of a New Research Domain
Andreea Ion, University Politehnica of Bucharest, Romania
Monica Patrascu, University Politehnica of Bucharest, Romania

Chapter 3

Definition of Static Nonlinear Procedure and Flexibility- Based model with Application on 2D Model for an Existing Structure and Comparing Results
Mourad Belgasmia, University of Setif Algeria, Algeria

Chapter 4

Experiments on a Ring Tension Setup and FE Analysis to Evaluate Transverse Mechanical Properties of Tubular Components: Experiments and Analysis of Ring Tension Test to Evaluate Mechanical Properties
Mahendra Kumar Samal, Bhabha Atomic Research Centre, India

Chapter 5

Dynamic Analysis of Offshore Wind Turbine Structures
Arundhuti Banerjee, Indian Institute of Technology (IIT) Delhi, India
Tanusree Chakraborty, Indian Institute of Technology (IIT) Delhi, India
Vasant Matsagar, Indian Institute of Technology (IIT) Delhi, India
Tushar Kanti Datta, Indian Institute of Technology (IIT) Delhi, India

Chapter 6

Seismic Reliability Analysis in the Framework of Metamodeling Based Monte Carlo Simulation: Metamodel based Seismic Reliability Analysis
Shyamal Ghosh, Indian Institute of Engineering Science and Technology, India
Soham Mitra, Indian Institute of Engineering Science and Technology, India
Swarup Ghosh, Indian Institute of Engineering Science and Technology, India
Subrata Chakraborty, Indian Institute of Engineering Science and Technology, Shubpur, India

Chapter 7

Finite Element Analysis of Pipe Bends Under External Loads
Sumesh Sasidharan, National Institute of Technology Tiruchirappalli, India
AR Veerappan, National Institute of Technology Tiruchirappalli, India
Subramaniam Shanmugam, National Institute of Technology Tiruchirappalli, India

Chapter 8

Fuzzy Structural Analysis Using Surrogate Models

A S Balu, National Institute of Technology Karnataka, India
B N Rao, Indian Institute of Technology Madras, India

Chapter 9

FE Analysis and Experimental Investigation of Cracked and Un-Cracked Thin-Walled Tubular Components to Evaluate Mechanical and Fracture Properties
Mahendra Kumar Samal, Bhabha Atomic Research Centre, India

Chapter 10

MARS and Neural Network Models for Shear Strength Prediction of Squat Reinforced Concrete Walls: Shear Strength of Squat Reinforced Concrete Walls
Anthony T.C. GOH, Nanyang Tech. Univ., Singapore
Wengang Zhang, Nanyang Tech. Univ., Singapore

Chapter 11

Nonlinear System Identification of Smart Buildings
Soroush Mohammadzadeh, University of Oklahoma, USA
Yeesock Kim, Worcester Polytechnic Institute (WPI), USA

Chapter 12

Polynomial Correlated Function Expansion
Souvik Chakraborty, Indian Institute of Technology Roorkee, India
Rajib Chowdhury, Indian Institute of Technology Roorkee, India

Chapter 13

Prevention of Corrosion in Austenitic Stainless Steel Through a Predictive Numerical Model Simulating Grain Boundary Chromium Depletion
Mahendra Kumar Samal, Bhabha Atomic Research Centre, India

Chapter 14

Risk Analysis of Structural Engineering Systems Using Bayesian Inference
Sharvil Alex Faroz, Indian Institute of Technology Bombay, India
Nikil Narayan Pujari, Indian Institute of Technology Bombay, India
Rohit Rastogi, Bhabha Atomic Research Centre, India
Siddhartha Ghosh, Indian Institute of Technology Bombay, India

Chapter 15

Simulating Post-earthquake Fire Loading in Conventional RC Structures
Behrouz Behnam, Amirkabir University of Technology (Tehran Polytechnic), Iran

Chapter 16

Structural Integrity Assessment And Control Of Ageing Onshore And Offshore Structures
R.M. Chandima Ratnayake, University of Stavanger, Norway
S.M. Samindi Samarakoon, University of Stavanger, Norway
