Socio-Cybernetic Study of God and the World-System

Part of the Research Essentials Collection

Masudul Alam Choudhury
(Sultan Qaboos University, Oman)

In any field—whether scientific, business, or social—ethics plays a critical role in determining what is acceptable in a particular community and what is considered taboo. The source of these preconditions is often a complex interweaving of tradition and rational thought.

Socio-Cybernetic Study of God and the World-System investigates morality in a socio-scientific worldview, examining the epistemology of existence in conjunction with Islamic monotheistic law to generate a world-system that governs action and reaction in the context of a variety of cognitive and social environments. Readers with backgrounds in finance and economics can utilize this book to construct a more thorough theoretical understanding of their societal and professional associations.

Topics Covered:

- Social systems
- Epistemology
- Banking Systems
- Ethics in Science
- Islam
- Morality
- Multiverse
- Social Science

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.

Dr. Masudul Alam Choudhury is Professor of Economics in the Department of Economics and Finance, College of Commerce and Economics, Sultan Qaboos University, Muscat, Sultanate of Oman. He is also the International Chair and a founder member of the Postgraduate Program in Islamic Economics and Finance, Trisakti University, Indonesia. Professor Choudhury taught economics for twenty-two years in Cape Breton University, Sydney, Nova Scotia, Canada before taking his retirement. He now continues on to conduct advanced research and teaches at all levels of pedagogy. His research area of focus and teaching at the doctoral level is economics and epistemology of unity of knowledge, and its functional ontological conceptualization and application to the world-system in diverse areas. In this domain are included political economy, economic theory, financial issues, and integral relations between science and society. His methodological approach is system-oriented and mathematical while invoking philosophy of science and empirical application. Professor Choudhury has published profusely in refereed journals and many book with leading scholarly publishers. His above-mentioned focus has prevailed in all such academic outlets.
