The COVID-19 Pandemic and the Digitalization of Diplomacy

Part of the Advances in Electronic Government, Digital Divide, and Regional Development Book Series

Floribert Patrick Calvain Endong (University of Dschang, Cameroon)

Description:

Today's business world is changing with the adoption of the internet of things (IoT). IoT is helping in prominently capturing a tremendous amount of data from multiple sources. Realizing the future and full potential of IoT devices will require an investment in new technologies.

The COVID-19 Pandemic and the Digitalization of Diplomacy demonstrates how the computer scientists and engineers of today might employ artificial intelligence in practical applications with the emerging cloud and IoT technologies. The book also gathers recent research works in emerging artificial intelligence methods and applications for processing and storing the data generated from the cloud-based internet of things. Covering key topics such as data, cybersecurity, blockchain, and artificial intelligence, this premier reference source is ideal for industry professionals, engineers, computer scientists, researchers, scholars, academicians, practitioners, instructors, and students.

Hardcover: \$235.00 Softcover: \$180.00 E-Book: \$235.00 Hardcover + E-Book: \$280.00

Topics Covered:

Artificial Intelligence
Blockchain
Cloud Computing
Cloud-Based Internet of Things
Cybersecurity

Data

Data Transmission
Distributed Systems
Internet of Things
Natural Language Processing
Smart Healthcare

Subject: Computer Science and Information

Technology

Readership Level: Advanced-Academic Level

(Research Recommended)

Classification: Edited Reference

Research Suitable for: Advanced Undergraduate

Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
