

# Microbial Biotechnology in Environmental Monitoring and Cleanup

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Pankaj (G. B. Pant University of Agriculture and Technology, India) and Anita Sharma (G. B. Pant University of Agriculture and Technology, India)

## Description:

Pollutants are increasing day by day in the environment due to human interference. Thus, it has become necessary to find solutions to clean up these hazardous pollutants to improve human, animal, and plant health.

**Microbial Biotechnology in Environmental Monitoring and Cleanup** is a critical scholarly resource that examines the toxic hazardous substances and their impact on the environment. Featuring coverage on a broad range of topics such as pollution of microorganisms, phytoremediation, and bioremediation, this book is geared towards academics, professionals, graduate students, and practitioners interested in emerging techniques for environmental decontamination.

**ISBN:** 9781522531265

**Release Date:** January, 2018

**Copyright:** 2018

**Pages:** 335

## Topics Covered:

- Bio-Fertilizers
- Bioremediation
- Microbial Degradation
- Microorganisms
- Organic Farming
- Pesticide Biodegradation
- Phytoremediation

**Hardcover:** \$235.00

**E-Book:** \$235.00

**Hardcover + E-Book:** \$280.00
