

Advanced Methodologies and Technologies in Government and Society

Part of the Advances in Public Policy and Administration Book Series

Mehdi Khosrow-Pour, D.B.A. (Information Resources Management Association, USA)

Description:

Governments must continuously update policies, laws, and legislation as the world continues to rapidly evolve due to technologies and changing cultural perspectives. To streamline policy creation and implementation, governments seek new and efficient methods to ensure their citizens' and communities' safety while also encouraging citizen participation.

Advanced Methodologies and Technologies in Government and Society provides research on emerging methodologies in effective governing including sections on public sector management and socioeconomic development. While highlighting the challenges facing government officials and law enforcement such as crisis response and natural disaster management, this book shows how technology use can make those areas of government more efficient and improve preventative measures. This book is an ideal resource for law enforcement, government officials and agencies, policymakers, public servants, citizen activists, researchers, and political leaders seeking cutting-edge information to strengthen their government's relationship with society and their constituents while also strengthening their policy measures through new technology and methods.
