## E-Government Implementation and Practice in Developing Countries

Zaigham Mahmood  
(University of Derby, UK)

Information and communication technologies have improved government practices and provided effective governance, processes, and services, which have influenced world governments to gather the resources needed to implement e-government projects in developing countries.

**E-Government Implementation and Practice in Developing Countries** provides research on the current actions being taken by developing countries towards the design, development, and implementation of e-government policies. This book will discuss current frameworks and strategies that are useful for project managers, government officials, researchers, and students interested or involved in the development and implementation of e-government planning. This book is part of the Advances in Electronic Government, Digital Divide, and Regional Development series collection.

### Topics Covered:

- Best Practices
- E-Government Policies
- ICT Infrastructure
- Knowledge Management in E-Government Projects
- Limitations, Barriers, and Issues
- Project Initiation
- Success Factors
