

International Journal of Applied Metaheuristic Computing (IJAMC)

ISSN: 1947-8283; EISSN: 1947-8291
Established 2010; Published Quarterly

Editor(s)-in-Chief: Peng-Yeng Yin (National Chi Nan University, Taiwan)

The International Journal of Applied Metaheuristic Computing (IJAMC) is a rigorous refereed journal that publishes high quality, innovative research on the latest developments, models, and applications within the transdisciplinary fields related to metaheuristic computing. Providing researchers, practitioners, and academicians with insight into a wide range of topics such as genetic algorithms, differential evolution, and ant colony optimization, this journal contains useful articles for those seeking to learn, analyze, improve, and apply technologies within metaheuristic computing.

Individual Price:

Print: US \$295
E-Journal: US \$295
Print + E-Journal: US \$360

Institution Price:

Print: US \$840
Online Access: US \$840
Print + Online Access: US \$1,015

Prices are subject to change without notification.

Topics Covered:

- Ant colony optimization
- Applications of metaheuristic computing
- Bio-inspired algorithm
- Control system, evolvable hardware, power system, vehicular system, communication system, transportation system, and simulation optimization
- Culture algorithm
- Cyber swarm algorithm
- Differential Evolution
- Distributed computing, multimedia processing, machine learning, data mining, bioinformatics, data security, network design, and decision making
- Ejection chain
- Evolutionary Computation
- Foraging algorithm
- Genetic Algorithm
- Government, education, economics, finance, and the others
- GRASP
- Greedy algorithm
- Hybrid method
- Hyper-heuristics
- Immune algorithm
- Local search
- Memetic algorithm
- Metaheuristics in dynamic, multi-objective, and constrained environment
- Model-based metaheuristics (matheuristics)
- Modeling and analysis of metaheuristic computing
- Particle Swarm Optimization
- Path relinking
- Random optimization
- Scatter search
- Simulated Annealing
- Soft Computing
- Strategic oscillation
- Supply-chain management, production scheduling, resource allocation, human resource planning, strategic planning, project portfolio management, and business process management
- Swarm-based algorithm
- Tabu search
- Variable neighborhood search
- Very large scale metaheuristics

SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at www.igi-global.com/publish/resources prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:
Peng-Yeng Yin, IJAMC@igi-global.com
