

Handbook of Research on Global Environmental Changes and Human Health

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Kholoud Kahime (Cadi Ayyad University, Morocco), Moulay Abdelmonaim El Hidan (Ibn Zohr University, Morocco), Omar El Hiba (Chouaib Doukkali University, Morocco & Cadi Ayyad University, Morocco), Denis Sereno (University of Montpellier, France) and Lahouari Bounoua (NASA, USA)

Description:

The faster climate change affects the globe, the faster individuals will see the negative consequences, which include the decline of general human health. Comprehension of all climate change-related etiologies is essential to understanding the importance of global environmental stability.

The **Handbook of Research on Global Environmental Changes and Human Health** is a collection of innovative research to manage the ensuing and numerous climate and anthropogenic threats to human health. While highlighting topics including government policy, human security, and population sensitivity, this book is ideally designed for environmentalists, policymakers, sociologists, physio pathologists, epidemiologists, and students seeking current research on reducing population sensitivity in terms of health related to the different climatic risks in the changing world.

ISBN: 9781522577751

Release Date: February, 2019

Copyright: 2019

Pages: 653

Topics Covered:

- Climate Change
- Extreme Weather
- Government Policy
- Health Adaption
- Human Security
- Neurological Diseases
- Population Sensitivity
- Public Health
- Vector-Borne Diseases
- Water Scarcity

Hardcover: \$265.00

E-Book: \$265.00

Hardcover + E-Book: \$320.00
