## Encyclopedia of Information Science and Technology (5 Volumes)

Mehdi Khosrow-Pour  
(Information Resources Management Association, USA)

Technology is constantly changing; what is cutting edge today is obsolete tomorrow. In this ever-evolving environment, educators, researchers and professionals of the discipline need access to the most comprehensive knowledge about the concepts, issues, trends and technologies in this hi-tech field.

**The Encyclopedia of Information Science and Technology** is the first work to map this ever-changing field. It is the most comprehensive, research-based encyclopedia consisting of contributions from over 900 noted researchers in over 50 countries. This five-volume encyclopedia includes more than 550 articles highlighting current concepts, issues and emerging technologies. These articles are enhanced by special attention that is paid to over 5,000 technical and managerial terms. These terms will each have a 5-50 word description that allow the users of this extensive research source to learn the language and terminology of the field. In addition, these volumes offer a thorough reference section with over 11,500 sources of information that can be accessed by scholars, students, and researchers in the field of information science and technology.

ISBN: 9781591405535; © 2005; 3807 pp.

Print: US \$1125.00 | Perpetual: US \$1690.00 | Print + Perpetual: US \$2250.00
