

Supporting the Education of Children with Autism Spectrum Disorders

Part of the Advances in Early Childhood and K-12 Education Book Series

Yefim Kats (Chestnut Hill College, USA)

Description:

Special education encompasses a broad range of techniques and tools for a catering to children with unique educational needs. Children in need of additional learning support, including children on the autism spectrum, benefit from continued research in emerging educational tools and pedagogies for best catering to their needs.

Supporting the Education of Children with Autism Spectrum Disorders focuses on a well-rounded approach to special education, including perspectives on administration and leadership, course development, psychological and counseling support, educational technologies, and classroom management strategies. Emphasizes timely research focused on creating opportune learning environments for children on the autism spectrum.

Readers:

This publication is an essential reference source for educators, school administrators, graduate-level students, and researchers in the field of education.
