

Indigenous Research of Land, Self, and Spirit

Part of the Advances in Religious and Cultural Studies Book Series

Robin Throne (University of the Cumberland, USA)

Description:

Indigenous cultures meticulously protect and preserve their traditions. Those traditions often have deep connections to the homelands of indigenous peoples, thus forming strong relationships between culture, land, and communities. Autoethnography can help shed light on the nature and complexity of these relationships.

Indigenous Research of Land, Self, and Spirit is a collection of innovative research that focuses on the ties between indigenous cultures and the constructs of land as self and agency. It also covers critical intersectional, feminist, and heuristic inquiries across a variety of indigenous peoples. Highlighting a broad range of topics including environmental studies, land rights, and storytelling, this book is ideally designed for policymakers, academicians, students, and researchers in the fields of sociology, diversity, anthropology, environmentalism, and history.
