

Advanced Models and Tools for Effective Decision Making Under Uncertainty and Risk Contexts

Part of the Advances in Business Strategy and Competitive Advantage Book Series

Vicente González-Prida (University of Seville, Spain) and María Carmen Carnero (University of Castilla-La Mancha, Spain)

Description:

Business industries depend on advanced models and tools that provide an optimal and objective decision-making process, ultimately guaranteeing improved competitiveness, reducing risk, and eliminating uncertainty. Thanks in part to the digital era of the modern world, reducing these conditions has become much more manageable.

Advanced Models and Tools for Effective Decision Making Under Uncertainty and Risk Contexts

provides research exploring the theoretical and practical aspects of effective decision making based not only on mathematical techniques, but also on those technological tools that are available nowadays in the Fourth Industrial Revolution. Featuring coverage on a broad range of topics such as industrial informatics, knowledge management, and production planning, this book is ideally designed for decision makers, researchers, engineers, academicians, and students.

ISBN: 9781799832461
