

An Excellent Addition to Your Library!

Released: April 2013

Security, Design, and Architecture for Broadband and Wireless Network Technologies

Naveen Chilamkurti
(La Trobe University, Australia)

While wireless technologies continue to provide an array of new challenges and multi-domain applications for business processes and solutions, there still remains to be a comprehensive understanding of its various dimensions and environments.

Security, Design, and Architecture for Broadband and Wireless Network Technologies provides a discussion on the latest research achievements in wireless networks and broadband technology. Highlighting new trends, applications, developments, and standards, this book is essential for next generation researchers and practitioners in the ICT field.

Topics Covered:

- Ad-hoc Networks
- Broadband Architecture
- Online Services
- Vehicular Networks
- Wireless Network Technologies
- Wireless Sensor Networks

ISBN: 9781466639027; © 2013; 384 pp.

Print: US \$190.00 | Perpetual: US \$285.00 | Print + Perpetual: US \$380.00

Pre-pub Discount:*

Print: US \$180.00 | Perpetual: US \$270.00

* Pre-pub price is good through one month after publication date.

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.

Naveen Chilamkurti teaches at La Trobe University (Melbourne, Australia). He holds a PhD and Master of Computer Science from La Trobe University. He is a senior member of IEEE Society and active in IEEE Communications and Computer Society technical committees. Dr. Naveen organized and chaired many international conferences in the areas of wireless computing, pervasive computing, and next generation wireless networks. He serves as technical program committee, steering committee, organizing committee, and track chair in many international conferences. Dr. Naveen has authored around seventy-five scientific publications, book chapter, and journals. He serves as an associate editor for six international journals such as *Wiley Journal of Communication Systems* and others. He also serves as a guest editor for various international journals. Dr. Naveen's research interests are primarily in the areas of wireless communications, multimedia, pervasive computing, 4G communications, wireless sensor networks, green networking, WiMAX, and RFID technologies.

Publishing Academic Excellence
at the Pace of Technology Since 1988

- Chapter 1**
Joint Angular and Time Diversity of Multi-Antenna CDMA Systems in Wireless Fading Channels
 She Feng (Alcatel-Lucent Shanghai Bell, China)
 Chen Hsiao Hwa (National Cheng Kung University, Taiwan)
 Li Hongyang (National Sun Yat-Sen University, Taiwan)
- Chapter 2**
Improving WLAN Performance by Modifying an IEEE 802.11 Protocol
 Sarkar Nurul I. (Auckland University of Technology, New Zealand)
- Chapter 3**
Insights from Experimental Research on Distributed Channel Assignment in Wireless Testbeds
 Juraschek Felix (Freie Universität Berlin, Germany)
 Günes Mesut (Freie Universität Berlin, Germany)
 Philipp Matthias (Freie Universität Berlin, Germany)
 Blywis Bastian (Freie Universität Berlin, Germany)
- Chapter 4**
HTTP Traffic Model for Web2.0 and Future WebX.0
 Deart Vladimir (Moscow Technical University of Communications and Informatics, Russia)
 Pilugin Alexander (Moscow Technical University of Communications and Informatics, Russia)
- Chapter 5**
DMT Optimal Cooperative MAC Protocols in Wireless Mesh Networks with Minimized Signaling Overhead
 Eserig Benoît (Universite de Toulouse, France)
- Chapter 6**
Performance Evaluation of a Three Node Client Relay System
 Andreev Sergey (Tampere University of Technology, Finland)
 Galinina Olga (Tampere University of Technology, Finland)
 Vinel Alexey (Tampere University of Technology, Finland)
- Chapter 7**
BER Fairness and P-APR Study of Interleaved OFDMA System
 Ahmed Sabbir (Ritsumeikan University, Japan)
 Kawai Makoto (Ritsumeikan University, Japan)
- Chapter 8**
Lifetime Maximization in Wireless Sensor Networks
 Katiyar Vivek (National Institute of Technology Hamirpur, India)
 Chand Narottam (National Institute of Technology Hamirpur, India)
 Soni Surender (National Institute of Technology Hamirpur, India)
- Chapter 9**
Doubly Cognitive Architecture Based Cognitive Wireless Sensor Networks
 Kumar Sumit (International Institute of Information Technology, Hyderabad, India)
 Singhal Deepti (International Institute of Information Technology, Hyderabad, India)
 Murthy Garimella Rama (International Institute of Information Technology, Hyderabad, India)
- Chapter 10**
Synchronous Relaying in Vehicular Ad-Hoc Networks
 Moltchanov D. (Tampere University of Technology, Finland)
 Vinel A. (Tampere University of Technology, Finland)
 Jakubiak J. (Tampere University of Technology, Finland)
 Koucheryavy Y. (Tampere University of Technology, Finland)
- Chapter 11**
Mobile WiMAX Bandwidth Reservation Thresholds:
 Khemiri Soudes (University of Paris 6, France)
 Boussetta Khaled (University of Paris 13, France)
 Achir Nadjib (University of Paris 13, France)
 Pujolle Guy (University of Paris 6, France)
- Chapter 12**
IP Paging for Mobile Hosts in Distributed and Fixed Hierarchical Mobile IP
 Upadhyay Paramesh C. (Sant Longowal Institute of Engineering & Technology, India)
 Tiwari Sudarshan (Motilal Nehru National Institute of Technology, India)
- Chapter 13**
Cooperation Among Members of Online Communities:
 Merani M. L. (University of Modena and Reggio Emilia, Italy)
 Capetta M. (University of Modena and Reggio Emilia, Italy)
 Saladino D. (University of Modena and Reggio Emilia, Italy)
- Chapter 14**
Load Balancing Aware Multiparty Secure Group Communication for Online Services in Wireless Mesh Networks
 Kumar Neeraj (Neeraj Kumar, CSED, Thapar University, Patiala (Punjab), India)
- Chapter 15**
Adaptive Sending Rate Over Wireless Mesh Networks Using SNR
 Fowler Scott (Linköping University, Sweden)
 Eberhard Marc (Aston University, UK)
 Blow Keith (Aston University, UK)
 Shaikh Ahmed (Aston University, UK)
- Chapter 16**
A Source Based On-Demand Data Forwarding Scheme for Wireless Sensor Networks
 Brandl Martin (Danube University Krems, Austria)
 Kos Andreas (St. Pölten University of Applied Sciences, Austria)
 Kellner Karlheinz (Danube University Krems, Austria)
 Mayerhofer Christian (St. Pölten University of Applied Sciences, Austria)
 Posniecek Thomas (Danube University Krems, Austria)
 Fabian Christian (St. Pölten University of Applied Sciences, Austria)
- Chapter 17**
Wireless Transport Layer Congestion Control Evaluation
 Ahuja Sanjay P. (University of North Florida, USA)
 Shore W. Russell (University of North Florida, USA)
- Chapter 18**
Co-Operative Load Balancing in Vehicular Ad Hoc Networks (VANETs)
 Ali G. G. Md. Nawaz (City University of Hong Kong, Hong Kong)
 Chan Edward (City University of Hong Kong, Hong Kong)
- Chapter 19**
Cooperative Error Control Mechanism Combining Cognitive Technology for Video Streaming Over Vehicular Networks
 Tsai Ming-Fong (Industrial Technology Research Institute, Taiwan)
 Chilamkurti Naveen (La Trobe University, Australia)
 Li Hsia-Hsin (Industrial Technology Research Institute, Taiwan)
- Chapter 20**
A Framework for External Interference-Aware Distributed Channel Assignment
 Juraschek Felix (Humboldt Universität zu Berlin, Germany)
 Günes Mesut (Freie Universität Berlin, Germany)
 Blywis Bastian (Freie Universität Berlin, Germany)
- Chapter 21**
An Efficient Data Dissemination Scheme for Warning Messages in Vehicular Ad Hoc Networks
 Javed Muhammad A. (The University of Newcastle, Australia)
 Khan Jamil Y. (The University of Newcastle, Australia)
