

Spatial Planning in the Big Data Revolution

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Angioletta Voghera (Politecnico di Torino, Italy) and Luigi La Riccia (Politecnico di Torino, Italy)

Description:

Through interaction with other databases such as social media, geographic information systems have the ability to build and obtain not only statistics defined on the flows of people, things, and information but also on perceptions, impressions, and opinions about specific places, territories, and landscapes. It is thus necessary to systematize, integrate, and coordinate the various sources of data (especially open data) to allow more appropriate and complete analysis, descriptions, and elaborations.

Spatial Planning in the Big Data Revolution is a critical scholarly resource that aims to bring together different methodologies that combine the potential of large data analysis with GIS applications in dedicated tools specifically for territorial, social, economic, environmental, transport, energy, real estate, and landscape evaluation. Additionally, the book addresses a number of fundamental objectives including the application of big data analysis in supporting territorial analysis, validating crowdsourcing and crowdmapping techniques, and disseminating information and community involvement. Urban planners, architects, researchers, academicians, professionals, and practitioners in such fields as computer science, data science, and business intelligence will benefit most from the research contained within this publication.

ISBN: 9781522579274

Release Date: March, 2019

Copyright: 2019

Pages: 359

Topics Covered:

- Big Data Analysis
- Collaborative Mapping
- E-Participation
- GIS
- Multicriteria Analysis
- Smart Cities
- Smart Web Platforms
- Spatial Analysis
- Sustainability
- Urban Informatics
- Volunteered Geographic Information (VGI)

Hardcover: \$195.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00
