

Handbook of Research on Ergonomics and Product Design

Part of the Advances in Chemical and Materials Engineering Book Series

Juan Luis Hernández Arellano (Autonomous University of Ciudad Juárez, Mexico), Aide Aracely Maldonado Macías (Autonomous University of Ciudad Juárez, Mexico), Juan Alberto Castillo Martínez (University of Rosario, Colombia) and Porfirio Peinado Coronado (Autonomous University of Ciudad Juárez, Mexico)

Description:

Product design is an important field where ergonomics and human factors should be applied. To achieve this goal, effective strategies for process improvement must be researched and implemented.

The **Handbook of Research on Ergonomics and Product Design** is a critical scholarly resource that provides new theories, methodologies, and applications of ergonomics and product design and redesign. Featuring a broad range of topics such as additive manufacturing, product analysis, and sustainable packing development, this book is geared towards academicians, practitioners, and researchers seeking current research on new theories, methods, and applications related to ergonomics and product design.

ISBN: 9781522552345

Release Date: April, 2018

Copyright: 2018

Pages: 350

Topics Covered:

- Additive Manufacturing
- Lean Manufacturing
- Mental Workload
- Physical Ergonomics
- Product Analysis
- Product Perception Method
- Sustainable Packing Development
- Task Analysis

Hardcover: \$235.00

E-Book: \$235.00

Hardcover + E-Book: \$280.00
