

Handbook of Research on Social, Economic, and Environmental Sustainability in the Development of Smart Cities

Part of the Advances in Environmental Engineering and Green Technologies (AEEGT) Book Series

Andrea Vesco (Istituto Superiore Mario Boella, Italy) and Francesco Ferrero (Istituto Superiore Mario Boella, Italy)

Description:

As population growth accelerates, researchers and professionals face challenges as they attempt to plan for the future. Urban planning is a significant component in addressing the key concerns as the world population moves towards the city and leaves the rural environment behind, yet there are many factors to consider for a well rounded community.

The **Handbook of Research on Social, Economic, and Environmental Sustainability in the Development of Smart Cities** brings together the necessary research and interdisciplinary discussion to address dilemmas created by population growth and the expansion of urban environments.

Readers:

This publication is an essential reference source for researchers, academicians, investors, and practitioners interested in the urban planning and technological advancements necessary for the creation of smart cities.

ISBN: 9781466682825

Release Date: April, 2015
