Bridging the Gap Between Growth Theory and Policy in Asia: An Extension of the Solow Growth Model

Rup Singh
(University of the South Pacific, Fiji)

Although economic growth is amongst the oldest of debates in Economics, there has been little advancement in growth theory since the classic works of Solow. As such, clear-cut answers to the context-specific determinants of growth, especially for developing countries, are rare.

Bridging the Gap Between Growth Theory and Policy in Asia: An Extension of the Solow Growth Model adds to the works of Solow by showing how his original model can be extended and used for policy, discussing issues in growth econometrics, including the theoretical underpinnings of growth models, and some of the important challenges in empirical studies on economic growth. This simpler manual will be highly useful for applied economists, policy makers, and graduate students.

Topics Covered:

- Convergence Debate
- Development Trends
- Empirical Growth Literature
- Estimates of Steady-State Growth Rates
- Impact of Trade Openness in China
- Major Theories of Economic Growth
- Model Specification
- Robustness Tests
- Sources of Economic Growth

ISBN: 9781466658486; © 2014; 341 pp.

Print: US \$195.00 | Perpetual: US \$295.00 | Print + Perpetual: US \$390.00

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.
