

Optimizing Higher Education Learning Through Activities and Assessments

Part of the Advances in Higher Education and Professional Development Book Series

Yukiko Inoue-Smith (University of Guam, Guam) and Troy McVey (University of Guam, Guam)

Description:

The mission of higher education in the 21st century must focus on optimizing learning for all students. In a shift from prioritizing effective teaching to active learning, it is understood that computer-enhanced environments provide a variety of ways to reach a wide range of learners who have differing backgrounds, ages, learning needs, and expectations. Integrating technology into teaching assumes greater importance to improve the learning experience.

Optimizing Higher Education Learning Through Activities and Assessments is a collection of innovative research that explores the link between effective course design and student engagement and optimizes learning and assessments in technology-enhanced environments and among diverse student populations. Its focus is on providing an understanding of the essential link between practices for effective “activities” and strategies for effective “assessments,” as well as providing examples of course designs aligned with assessments, positioning college educators both as leaders and followers in the cycle of lifelong learning. While highlighting a broad range of topics including collaborative teaching, active learning, and flipped classroom methods, this book is ideally designed for educators, curriculum developers, instructional designers, administrators, researchers, academicians, and students.

ISBN: 9781799840367

Pages: 300

Copyright: 2021

Release Date: October, 2020

Hardcover: \$195.00

Softcover: \$150.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00

Topics Covered:

Active Learning
Assessment Strategies
Blended Course Design
Collaborative Teaching
Course Syllabus Design
Diversity
Feedback Strategies

Flipped Classroom Methods
Grading Strategies
Learner-Centered Pedagogy
Scholarship of Assessment
Student Engagement
University Teaching Methods

Subject: Education

Classification: Edited Reference

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
