

Data Analysis and Methods of Qualitative Research

Part of the Advances in Library and Information Science Book Series

Silas Memory Madondo (Senior Researcher-CeDRE International Africa Pvt, Zimbabwe)

Description:

An intellectual property discussion is central to qualitative research projects, and ethical guidelines are essential to the safe accomplishment of research projects. Undertaking research studies without adhering to ethics may be dangerous to researchers and research subjects. Therefore, it is important to understand and develop practical techniques for handling ethics with a specific focus on qualitative projects so that researchers conducting this type of research may continue to use ethical practices at every step of the project.

Data Analysis and Methods of Qualitative Research discusses in detail the methods related to the social constructionist paradigm that is popular with qualitative research projects. These methods help researchers undertake ideal qualitative projects that are free from quantitative research techniques/concepts all while acquiring practical skills in handling ethics and ethical issues in qualitative projects. The chapters each contain case studies, learning outcomes, question and answer sections, and discuss critical research philosophies in detail along with topics such as ethics, research design, data gathering and sampling methods, research outputs, data analysis, and report writing. Featuring a wide range of topics such as epistemology, probability sampling, and big data, this book is ideal for researchers, practitioners, computer scientists, academicians, analysts, coders, and students looking to become competent qualitative research specialists.

ISBN: 9781799885498

Pages: 300

Copyright: 2021

Release Date: April, 2021

Hardcover: \$165.00

Softcover: \$125.00

E-Book: \$165.00

Hardcover + E-Book: \$195.00

Topics Covered:

Big Data

Coding

Data Analysis

Epistemology

Ethics

Ethnography

Ontology

Probability Sampling

Qualitative Philosophy

Qualitative Research

Research Methodology

Snowball Sampling

Social Constructionist Philosophy

Subject: Library and Information Science

Classification: Research Insights

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
