

Transformation and Efficiency Enhancement of Public Utilities Systems: Multidimensional Aspects and Perspectives

Part of the Advances in Human Services and Public Health Book Series

Jordan Gjorchev (International Slavic University, Macedonia),
Samoil Malcheski (International Slavic University, Macedonia),
Tamara Radenovic (University of Niš, Serbia), Dejan Vasovic (University of Niš, Serbia) and Snežana Živkovic (University of Niš, Serbia)

Description:

Much remains to be known about public utilities system organization, efficiency, management, legislation, practices, and solutions worldwide, as well as the implications for sustainable development in different countries. Thus, a better understanding of the different management practices in public utilities across different contexts is needed to assess their impact on efficiency and sustainability, especially in the changed climate conditions.

Transformation and Efficiency Enhancement of Public Utilities Systems: Multidimensional Aspects and Perspectives considers the necessity to transform public utilities systems towards sustainability and efficiency. This publication investigates the performance management process of public utility systems and evaluates the efficiency of public utilities to propose potential improvements. The book encourages amenable authorities to create more efficient and effective management systems and improve their performance. Additionally, it provides the government with a systemic approach to public utilities system transformation and development. Covering key topics such as public hygiene, sustainability, and environmental protection, this premier reference source is ideal for government officials, policymakers, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students.

ISBN: 9781668477304

Pages: 300
