

Smart Cities as a Solution for Reducing Urban Waste and Pollution

Part of the Advances in Environmental Engineering and Green Technologies (AEEGT) Book Series

Goh Bee Hua (National University of Singapore, Singapore)

Description:

The exponential growth of urban settings has led to an increase in pollutants and waste management issues around the world. As the environment continues to falter under the weight of these pressing issues, it has become increasingly imperative to develop new technologies and methodologies that have the potential to improve the overall sustainability and cleanliness of these cities.

Smart Cities as a Solution for Reducing Urban Waste and Pollution examines emergent research on smart innovations within built urban environments. Features best practices and theoretical frameworks, as well as potential issues in the implementation of smart and green technology in urban settings.

Readers:

This publication is a vital reference source for graduate students, researchers, academics, engineers, architects, facility managers, and government officials.

ISBN: 978-1-5225-0302-6

Release Date: June, 2016

Copyright: 2016

Pages: 300

Topics Covered:

- Building Components
- Emission Reduction
- Noise Pollution
- Passive Design Strategies
- Sustainable Construction Materials
- Sustainable Energy
- Transportation Efficiency
