

# Handbook of Research on Modern Optimization Algorithms and Applications in Engineering and Economics

Part of the Advances in Computational Intelligence and Robotics (ACIR) Book Series

Pandian Vasant (Universiti Teknologi Petronas, Malaysia), Gerhard-Wilhelm Weber (Middle East Technical University, Turkey) and Vo Ngoc Dieu (Ho Chi Minh City University of Technology, Vietnam)

## Description:

Modern optimization approaches have attracted many research scientists, decision makers and practicing researchers in recent years as powerful intelligent computational techniques for solving several complex real-world problems.

The **Handbook of Research on Modern Optimization Algorithms and Applications in Engineering and Economics** highlights the latest research innovations and applications of algorithms designed for optimization applications within the fields of engineering, IT, and economics.

## Readers:

Focusing on a variety of methods and systems as well as practical examples, this book is a significant resource for graduate-level students, decision makers, and researchers in both public and private sectors who are seeking research-based methods for modeling uncertain real-world problems.

**ISBN:** 9781466696440

**Release Date:** January, 2016

**Copyright:** 2016

**Pages:** 684

## Topics Covered:

- Combinatorial Optimization Methods
- Dynamic Programming Methods
- Hybrid Systems
- Linear Programming Methods
- Mixed-Integer Programming Methods
- Optimal Control Methods
- Stochastic Optimal Control Methods

**Hardcover +  
Free E-Access:**

**\$325.00**

**E-Access +  
Free Hardcover:**
