## Feral Information Systems Development: Managerial Implications

Part of the Advances in Business Information Systems and Analytics Book Series

Donald Vance Kerr (University of the Sunshine Coast, Australia),  
Kevin Burgess (Cranfield University, UK), and  
Luke Houghton (Griffith University, Australia)

Management invests in large information systems in order to improve the effectiveness of their organization. However, when these systems fail to meet the needs of organizational employees, feral information systems (FIS) are created in order to assist workers with their jobs or to avoid existing organizational information systems.

**Feral Information Systems Development: Managerial Implications** seeks to accelerate the collective understandings and implications on the management of business organizations; with an emphasis on theoretical explanations on the development of feral information systems. This book is an essential reference work aimed at providing a more clearly defined and better informed starting point for researchers, consultants, and practitioners who are eager to advance both their practical applications and theoretical understandings of complex and challenging phenomena surrounding FISs.

### Topics Covered:

- Enterprise Resource Planning
- Feral Government
- Feral Information Systems
- Organizational and Managerial Conflict
- Research Methodology and Philosophy
- Sociological Perspectives

ISBN: 9781466650275; © 2014; 303 pp.

Print: US \$185.00 | Perpetual: US \$280.00 | Print + Perpetual: US \$370.00

### Pre-pub Discount:\*

Print: US \$175.00 | Perpetual: US \$265.00

\* Pre-pub price is good through one month after publication date.

**Market:** This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.

**Donald Vance Kerr, PhD**, is an Associate Professor of Information Systems at the University of the Sunshine Coast. His research interests include assessing and monitoring the level of online fraud amongst senior citizens, the development and evaluation of decision support systems and the evaluation of the implementation of enterprise resource planning systems with particular emphasis on training and security. He has published 76 peer reviewed papers in both agricultural and management journals and conferences over the past 20 years.

Publishing Academic Excellence  
at the Pace of Technology Since 1988

Chapter 1  
*Feral Government?*  
Annie Maddison (Cranfield University, UK)

Chapter 2  
*Feral Information Systems and Workarounds:*  
Don Kerr (University of the Sunshine Coast, Australia)

Chapter 3  
*Feral Systems as Institutional Phenomena:*  
Nelson King (American University of Beirut, Lebanon)  
Bijan Azad (American University of Beirut, Lebanon)

Chapter 4  
*Feral Systems and Enterprise Resource Planning Systems:*  
Christian Koch (Chalmers University of Technology, Sweden)  
Don Kerr (University of the Sunshine Coast, Australia)

Chapter 5  
*Sensemaking as Feral Information Systems:*  
Luke Houghton (Griffith University, Australia)  
Dale Mackrell (University of Canberra, Australia)

Chapter 6  
*Money:*  
Sarah Craig (University of the Sunshine Coast, Australia)

Chapter 7  
*Motives for Feral Systems in Denmark*  
Torben Tambo (Aarhus University, Denmark)  
Martin Olsen (Aarhus University, Denmark)  
Lars Bækgaard (Aarhus University, Denmark)

Chapter 8  
*What Drives the End User to Build a Feral Information System?*  
Anthony Spierings (University of the Sunshine Coast, Australia)

Chapter 9  
*Understanding Feral IT Practices as Deviance:*  
Shubhankar Thatte (Swinburne University of Technology, Australia)  
Nick Grainger (Swinburne University of Technology, Australia)  
Judy McKay (Swinburne University of Technology, Australia)

Chapter 10  
*Participation in Social Networks as Feral Information Systems*  
Enrico Franchi (University of Parma, Italy)  
Agostino Poggi (University of Parma, Italy)  
Michele Tomaiuolo (University of Parma, Italy)

Chapter 11  
*Architectural Issues Related to Feral Information Systems*  
Lars Bækgaard (Aarhus University, Denmark)  
Martin Olsen (Aarhus University, Denmark)  
Torben Tambo (Aarhus University, Denmark)

Chapter 12  
*Feral Systems in Enterprise Resource Planning Systems:*  
Kevin Burgess (Cranfield University, UK)
