

Library Technology Funding, Planning, and Deployment

Part of the Advances in Library and Information Science Book Series

Edward Iglesias (Stephen F. Austin State University, USA)

Description:

Advancements in technology are impacting many businesses and institutions, including libraries. As such, it is increasingly imperative to research purchasing methods to boost cost-effectiveness and efficiency.

Library Technology Funding, Planning, and Deployment is an authoritative reference source for the latest research on the best methods of the purchase and implementation of various technology systems by libraries. Features extensive coverage across a range of relevant perspectives and topics, such as library systems management, Open Source software, and budget constraints.

Readers:

This book is ideally designed for academicians, researchers, practitioners and librarians seeking current research on library purchase and utilization of technology.
