

Driving the Development, Management, and Sustainability of Cognitive Cities

Part of the Practice, Progress, and Proficiency in Sustainability Book Series

Kiran Ahuja (DAV Institute of Engineering and Technology, India) and
Arun Khosla (Dr. B.R. Ambedkar National Institute of Technology,
India)

Description:

The technological advancements of today not only affect individual's personal lives. They also affect the way urban communities regard the improvement of their resident's lives. Research involving these autonomic reactions to the growing needs of the people is desperately needed to transform the cities of today into the cities of the future.

Driving the Development, Management, and Sustainability of Cognitive Cities is a pivotal reference source that explores and improves the understanding of the strategic role of sustainable cognitive cities in residents' routine life styles. Such benefits to residents and businesses include having access to world-class training while sitting at home, having their wellbeing observed consistently, and having their medical issues identified before occurrence. This book is ideally designed for administrators, policymakers, industrialists, and researchers seeking current research on developing and managing cognitive cities.
