

Redesigning Higher Education Initiatives for Industry 4.0

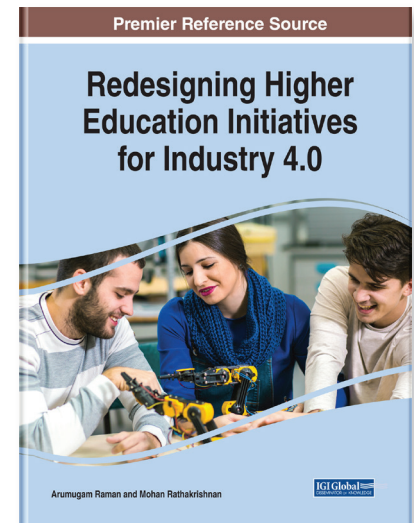

Part of the Advances in Higher Education and Professional Development Book Series

Arumugam Raman (Universiti Utara Malaysia, Malaysia) and Mohan Rathakrishnan (Universiti Utara Malaysia, Malaysia)

Description:

The Fourth Industrial Revolution is introducing automation technology into all major disciplines, including business, engineering, and education. Higher education institutions need to incorporate this digital transformation in order to remain competitive.

Redesigning Higher Education Initiatives for Industry 4.0 is an essential reference source that discusses education strategies for human-computer interactions in an automated world and the role of education in conjunction with artificial intelligence and virtual technologies. Featuring research on topics such as e-learning, mobile devices, and artificial intelligence, this book is ideally designed for professionals, IT specialists, researchers, librarians, administrators, and educators.
