Anastasios Moutmzoglou (Hellenic Society for Quality & Safety in Health-care and P. & A. Kyriakou Children's Hospital, Greece) and Anastasia Kastania (Athens University of Economics and Business, Greece)

Advancements in technology regularly influence the healthcare field and developing aspects on medical patient safety. Implementing electronic health records, decision support systems, and computerized physician order entry systems reduces risk in the potential for e-health to make errors leading to adverse events.

**E-Health Technologies and Improving Patient Safety: Exploring Organizational Factors** presents an overview on information and communication technologies and addresses the impacts on the field of both patient safety and e-health. This book offers insightful perspectives and concentrated research on concepts related to these areas, as well as issues and current trends in patient safety in e-health.

### Topics Covered:

- Decision Support Systems
- E-Health
- Electronic Health Records
- Health Care Organizations
- Improving Patient Safety
- Medical Simulation
- RFID Technologies
- Telemedicine

**Market:** This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

**Anastasios Moutmzoglou**, Ph.D., is an Executive Board Member of the European Society for Quality in HealthCare (ESQH), and President of the Hellenic Society for Quality & Safety in HealthCare (HSQSH). He holds B.A. in Economics (National & Kapodistrian University of Athens), MA in Health Services Management (National School of Public Health), MA in Macroeconomics (The University of Liverpool), and Ph.D. in Economics (National & Kapodistrian University of Athens). He works for 'P. & A. Kyriakou' Children's Hospital and teaches the module of quality at the graduate and postgraduate level. He has written three books, which are the only ones in the Greek references. He has also served as a scientific coordinator and researcher in Greek and European research programs. In 2004, he was declared "Person of Quality in Healthcare", with respect to Greece. His research interests include healthcare management, quality, knowledge management, pensions, and the dualism of the labor market.
