

New Technological Applications for Foreign and Second Language Learning and Teaching

Part of the Advances in Educational Technologies and Instructional Design Book Series

Mariusz Kruk (University of Zielona Góra, Poland), and Mark Peterson (Kyoto University, Japan)

Description:

Population diversity is becoming more prevalent globally with increasing immigration, emigration, and refugee placement. These circumstances increase the likelihood that a child will be raised speaking a different language in the home than the common language used in each country. This necessitates the development of comprehensive strategies that promote second language learning through the adoption of new technological advancements.

New Technological Applications for Foreign and Second Language Learning and Teaching is a scholarly publication that explores how the latest technologies have the potential to engage foreign and second language learners both within and outside the language classroom and to facilitate language learning and teaching in the target language. Highlighting a range of topics such as learning analytics, digital games, and telecollaboration, this book is ideal for teachers, instructional designers, curriculum developers, IT consultants, educational software developers, language learning specialists, academicians, administrators, professionals, researchers, and students.

ISBN: 9781799825913

Pages: 300

Copyright: 2020

Release Date: March, 2020

Hardcover: \$195.00

Softcover: \$150.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00

Topics Covered:

Course Design
Digital Environments
Digital Games
Evaluation
Immersive Virtual Reality

Language Learning Systems
Learning Analytics
Online Learning
Special Education
Telecollaboration

Subject: Education

Classification: Edited Reference

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
