

Transport of Information-Carriers in Semiconductors and Nanodevices

Part of the Advances in Computer and Electrical Engineering Book Series

Muhammad El-Saba (Ain-Shams University, Egypt)

Description:

Rapid developments in technology have led to enhanced electronic systems and applications. When utilized correctly, these can have significant impacts on communication and computer systems.

Transport of Information-Carriers in Semiconductors and Nanodevices is an innovative source of academic material on transport modelling in semiconductor material and nanoscale devices. Including a range of perspectives on relevant topics such as charge carriers, semiclassical transport theory, and organic semiconductors, this is an ideal publication for engineers, researchers, academics, professionals, and practitioners interested in emerging developments on transport equations that govern information carriers.

ISBN: 9781522523123

Release Date: June, 2017

Copyright: 2017

Pages: 608

Topics Covered:

- Charge Carriers
- Electronic Spin Transport
- Low-Dimensional Semiconductors
- Nanotubes
- Nanowires
- Organic Semiconductors
- Phonon Transport
- Quantum Transport Theory
- Semiclassical Transport Theory

Hardcover: **\$225.00**

E-Book: **\$225.00**

Hardcover + E-Book: **\$270.00**
