

# Global Perspectives on Cybersecurity Risk in Contemporary Business Systems

Part of the Advances in Information Security, Privacy, and Ethics Book Series

Festus Fatai Adedoyin (Bournemouth University, UK) and  
Bryan Christiansen (Southern New Hampshire University, USA)

## Description:

The field of cybersecurity is becoming increasingly important due to the continuously expanding reliance on computer systems, the internet, wireless network standards such as Bluetooth and wi-fi, and the growth of “smart” devices, including smartphones, televisions, and the various devices that constitute the internet of things (IoT). Cybersecurity is also one of the significant challenges in the contemporary world, due to its complexity, both in terms of political usage and technology.

**Global Perspectives on Cybersecurity Risk in Contemporary Business Systems** examines current risks involved in the cybersecurity of various business systems today from a global perspective and investigates critical business systems. Covering key topics such as artificial intelligence, hacking, and software, this reference work is ideal for computer scientists, industry professionals, policymakers, researchers, academicians, scholars, instructors, and students.
