# Future of Digital Technology and AI in Social Sectors

Part of the Advances in Computational Intelligence and Robotics Book Series

Duygu Çelik Ertuğrul (Eastern Mediterranean U., TRNC, Turkey) and Atilla Elci (Hasan Kalyoncu University, Turkey)

Description:

In a rapidly evolving digital landscape, integrating emerging technologies presents unprecedented opportunities and complex challenges across various disciplines. As society navigates this transformation, there is a growing need for comprehensive insights into the implications of these advancements. This book serves as a vital resource, offering a multidimensional exploration of how emerging technologies are reshaping the social sciences, education, law and policy, tourism, health, environment, communication, business and management, and security.

Focusing on the intersection of technology and society, the Future of Digital Technology and AI in Social Sectors addresses pressing issues such as ethical dilemmas in technological advancement, the impact of automation on employment, and the moral and legal challenges of AI and data analytics. By providing a platform for researchers and practitioners to delve into these topics, the book aims to foster a deeper understanding of emerging technologies' implications and opportunities across diverse fields.

Researchers and practitioners alike will find this book invaluable for gaining new perspectives and insights into the far-reaching effects of emerging technologies. By offering a comprehensive analysis of these advancements, the book aims to contribute to the ongoing dialogue on technology's role in shaping society's future. Scholars, educators, policymakers, and industry professionals can use this reference to explore the transformative power of emerging technologies in today's world.

ISBN: 9798369355336   **Pages:** 330   **Copyright:** 2024   **Release Date:** September, 2024

Hardcover: $315.00   **E-Book: $315.00**   **Hardcover + E-Book: $380.00**

Topics Covered:

- Adaptive Learning
- AI Surveillance
- AR/VR in Communication
- Blockchain for Supply Chain
- Business Analytics
- Cloud Computing
- Digital Citizenship
- Digital Inequality

- Diversity Tech in HR
- Health Chatbots
- Learning Management
- Online Activism
- Personalized Medicine
- Robotics in Hospitality
- Wearable Health Tech

Subject: Computer Science & Information Technology

Classification: Edited Reference

Readership Level: Advanced-Academic Level (Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
