

Handbook of Research on Urban and Humanitarian Logistics

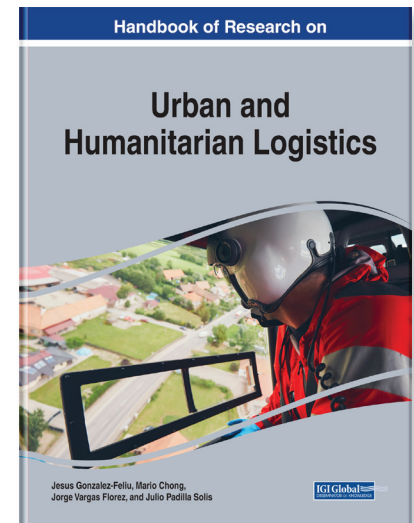

Part of the Advances in Logistics, Operations, and Management Science Book Series

Jesus Gonzalez-Feliu (Ecole Nationale Supérieure des Mines de Saint-Étienne, France), Mario Chong (Universidad del Pacífico, Peru), Jorge Vargas Florez (Pontificia Universidad Católica del Perú, Peru) and Julio Padilla Solis (Universidad de Lima, Peru)

Description:

City logistics is one of the most popular fields of transportation sciences, dealing with sustainably supplying cities and at the same time reducing congestion and pollution related to goods transport in urban areas. Recently, humanitarian, emergency, and crises logistics has been a subject of increasing interest, often seen from an international viewpoint. However, some of the recent natural crises have shown the importance of resilience and reliability of the current urban logistics systems.

The **Handbook of Research on Urban and Humanitarian Logistics** is a critical scholarly publication that addresses urban logistics and resilience, sustainable urban logistics, humanitarian logistics in urban areas both for crisis or long-term, and planning for resilient urban development. Featuring a broad range of topics that discuss the new and future trends in urban logistics and resilient cities, this publication is ideal for public planners; urban planners; company managers in logistics and transport; consulting agencies; regional, national, and international institutions and organizations; researchers; academicians; and students.
